

# **Guide in computing waiver application payment**

*The illustrated example(s) purely serves as guide when making waiver application payment*

# Example 1

E.g. 1 – Waiver to consider allowing mounting height of exit sign to deviate from SS563

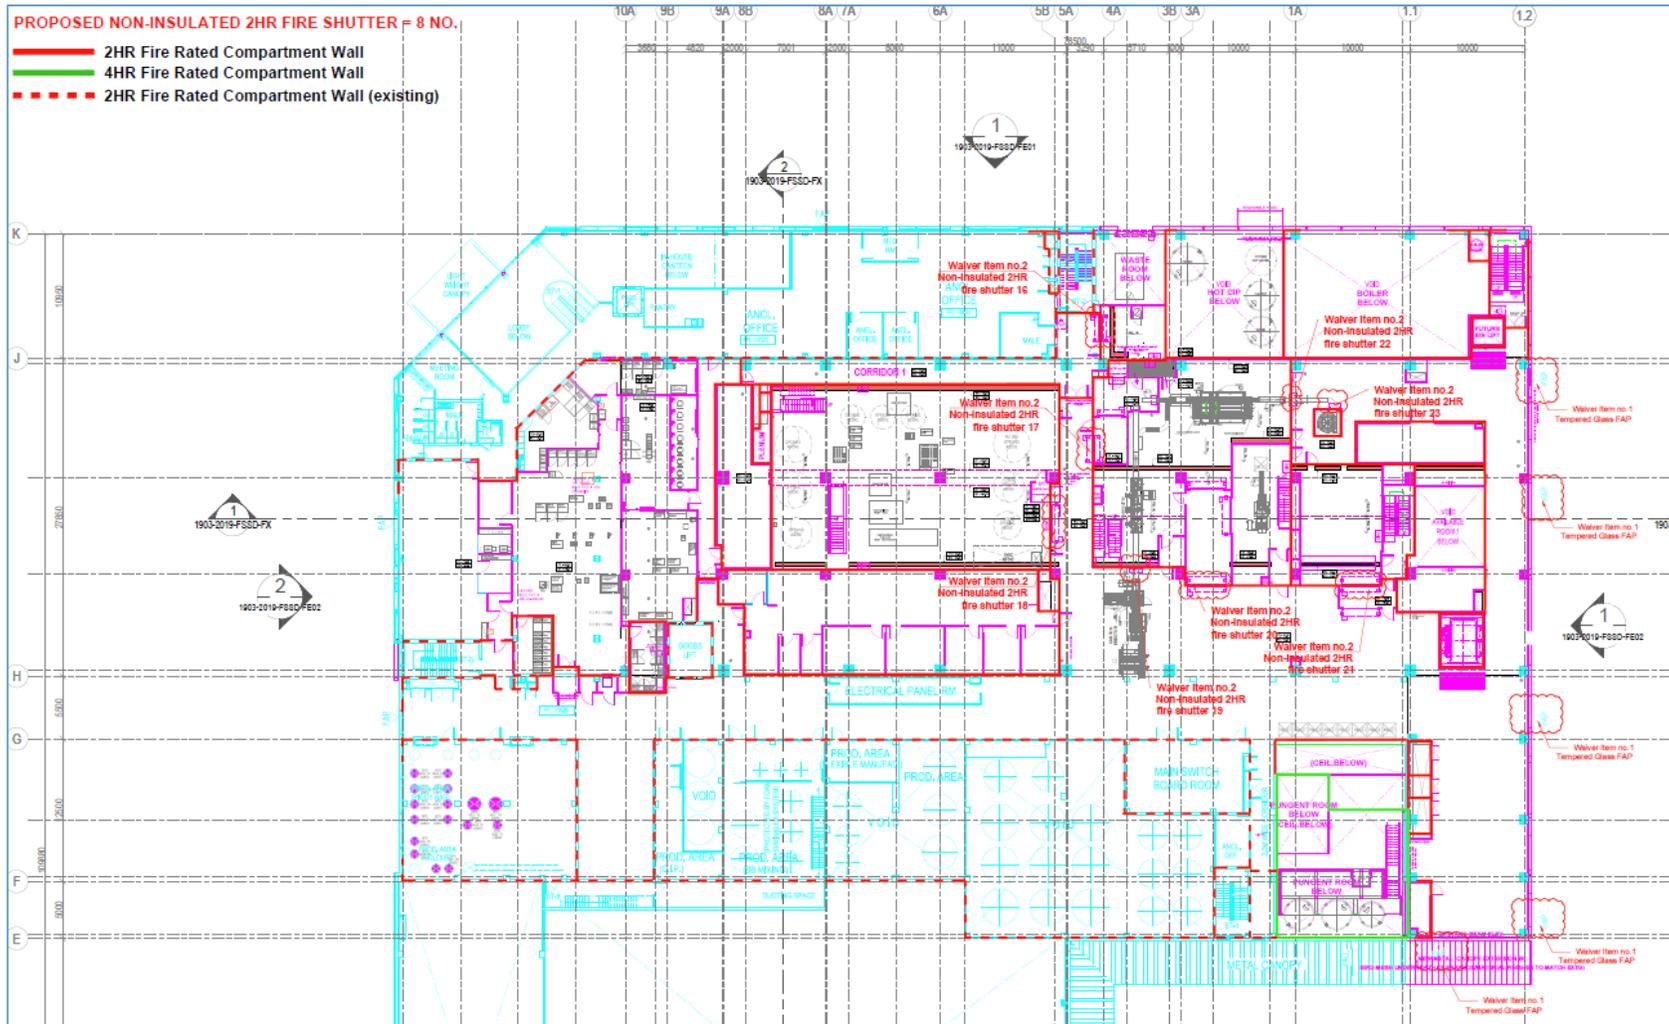

APPENDIX B - EXIT SIGNAGE HEIGHT @ LEVEL 2

- One fee for the application as the deviation is on the same floor but different location.

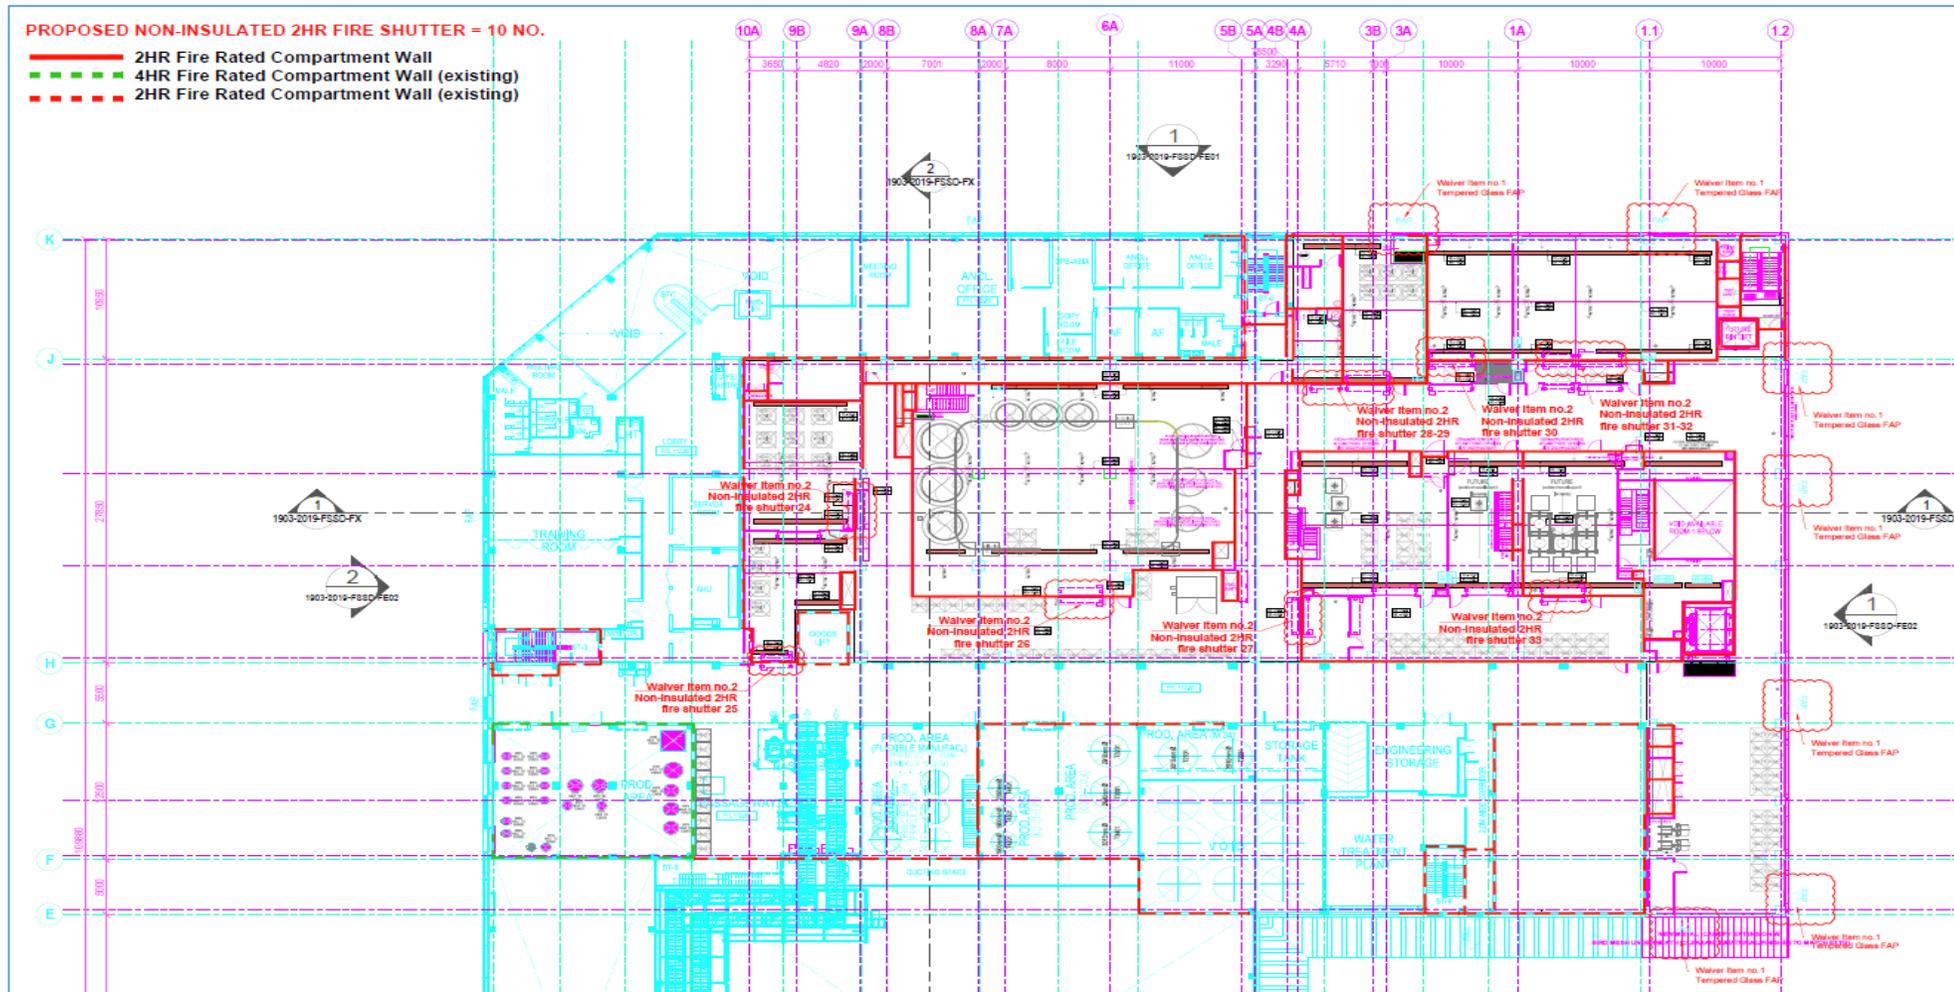

# Example 2

## E.g. 2 – Waiver to consider allowing the use of non-insulated fire rated shutter (2<sup>nd</sup> floor)

- Different assessment is required at the different floor where the fire rated shutter without insulation is proposed (different design variation), hence each floor shall be charged separately

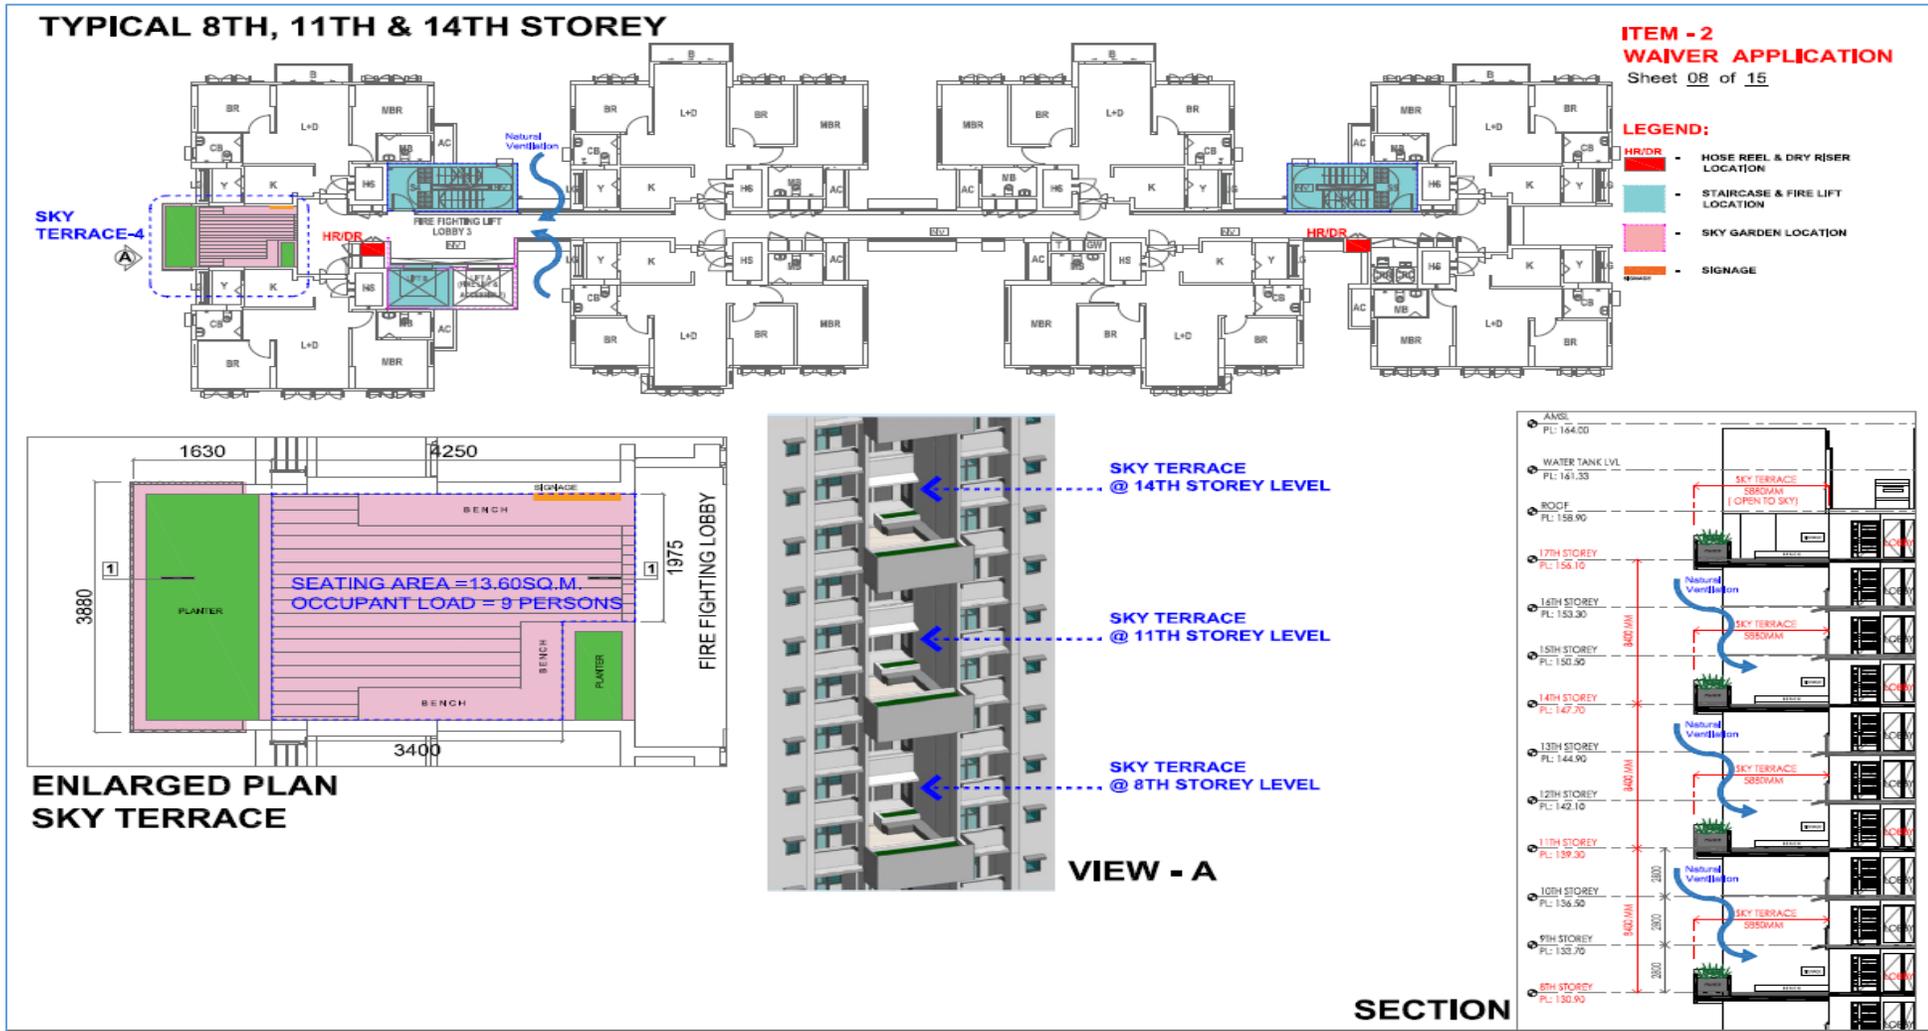

## E.g. 2 – Waiver to consider allowing the use of non-insulated fire rated shutter (3<sup>rd</sup> floor)

- Different assessment is required at the different floor where the fire rated shutter without insulation is proposed (different design variation), hence each floor shall be charged separately

# Example 3

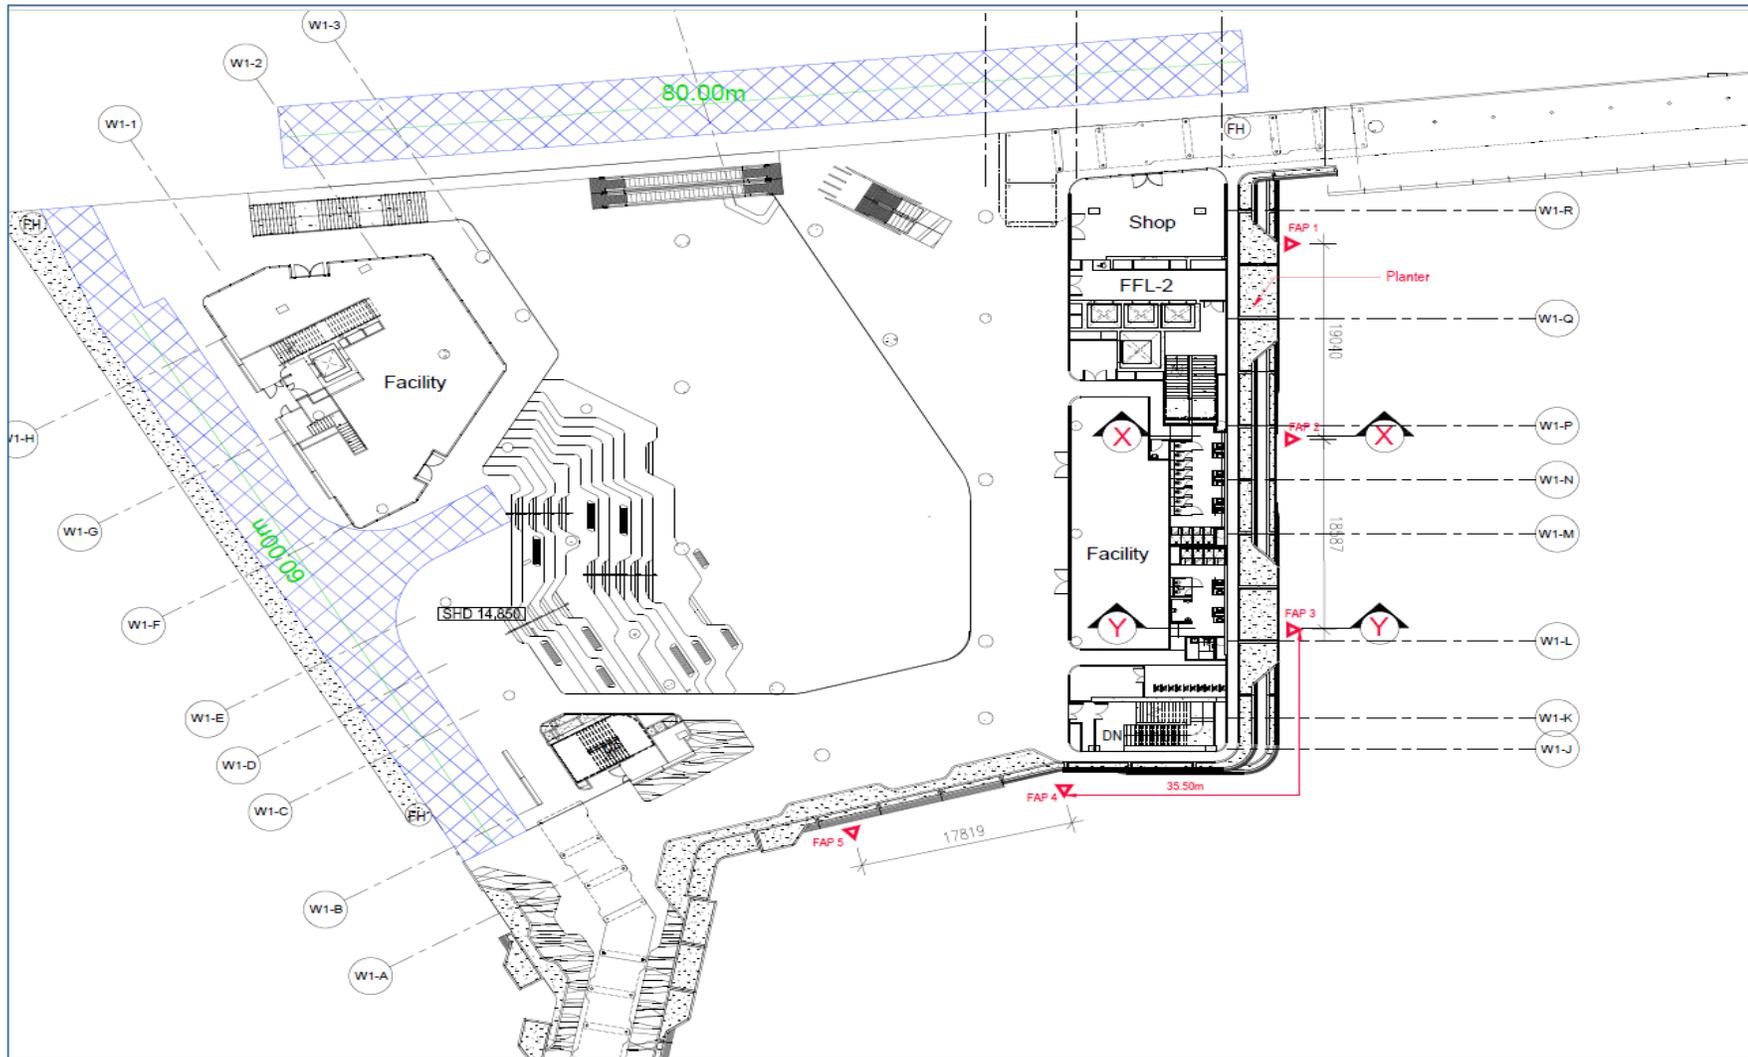

E.g. 3 – Waiver to consider exempting sprinkler provision on non-residential floors within a residential block

- Similar design layout span over different floors on the same block, hence treated as one single waiver

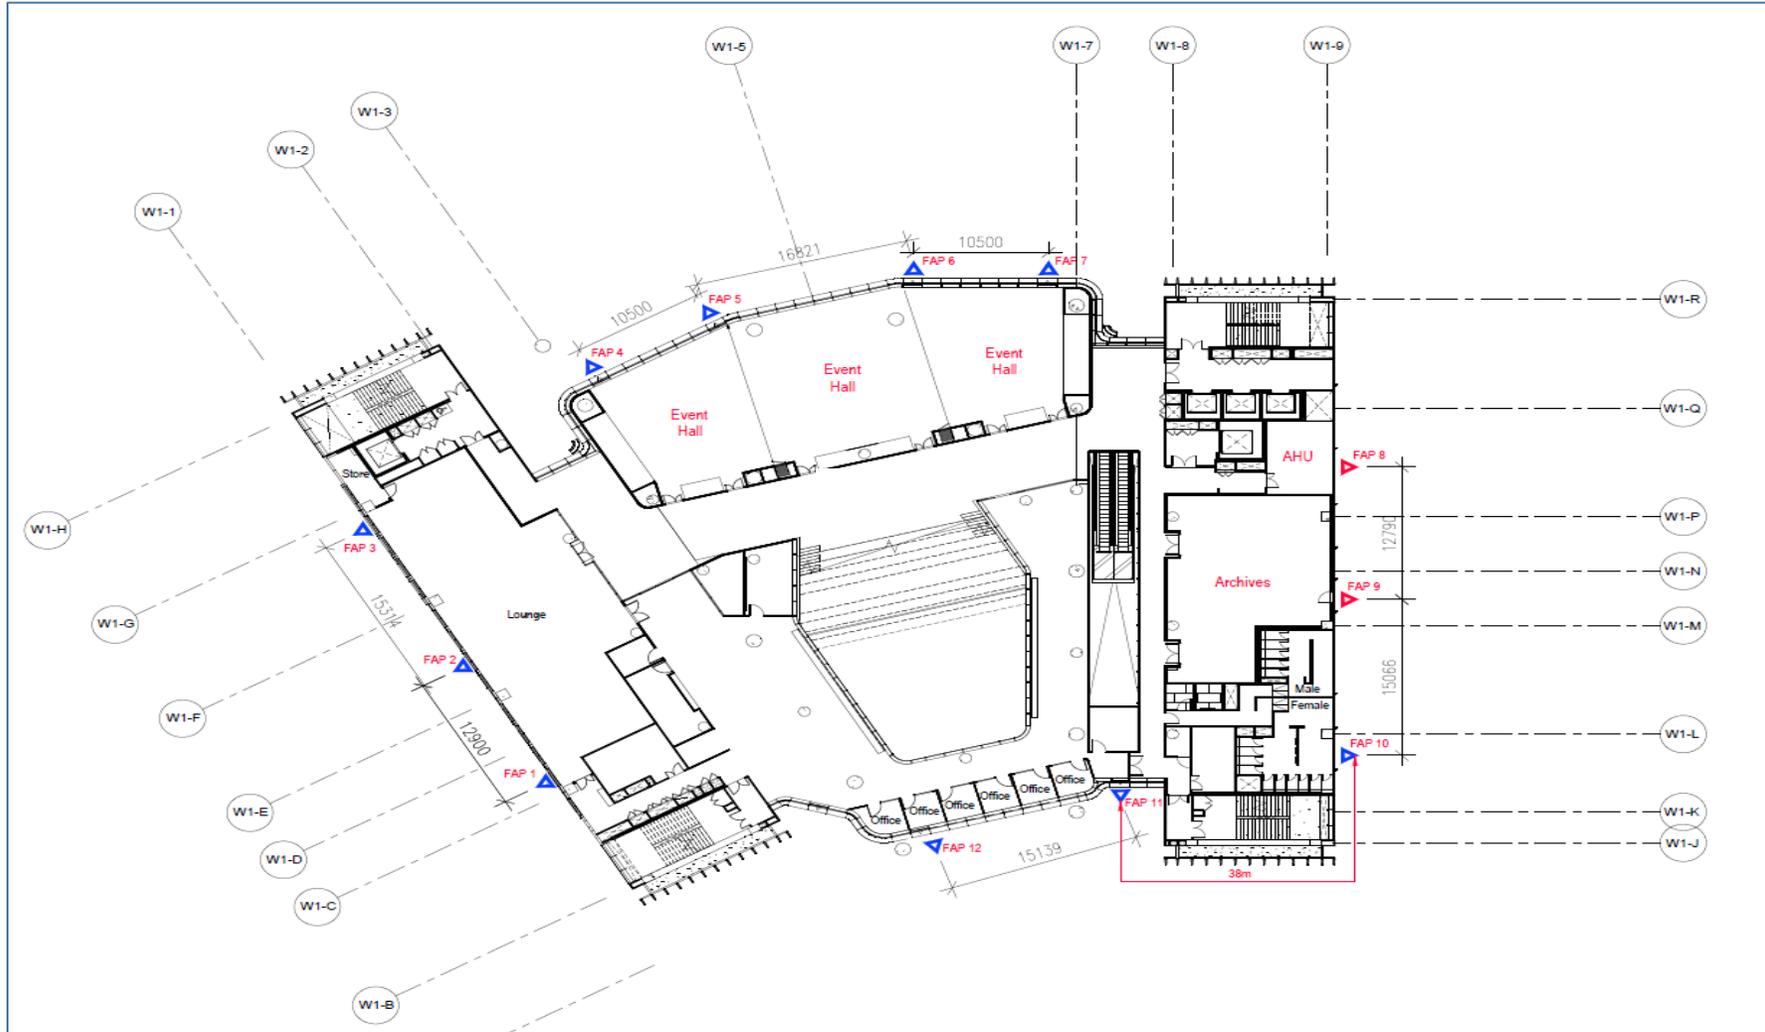

# Example 4

E.g. 4 – Waiver to consider allowing fireman access panel to be spaced more than 20m apart (2<sup>nd</sup> floor)

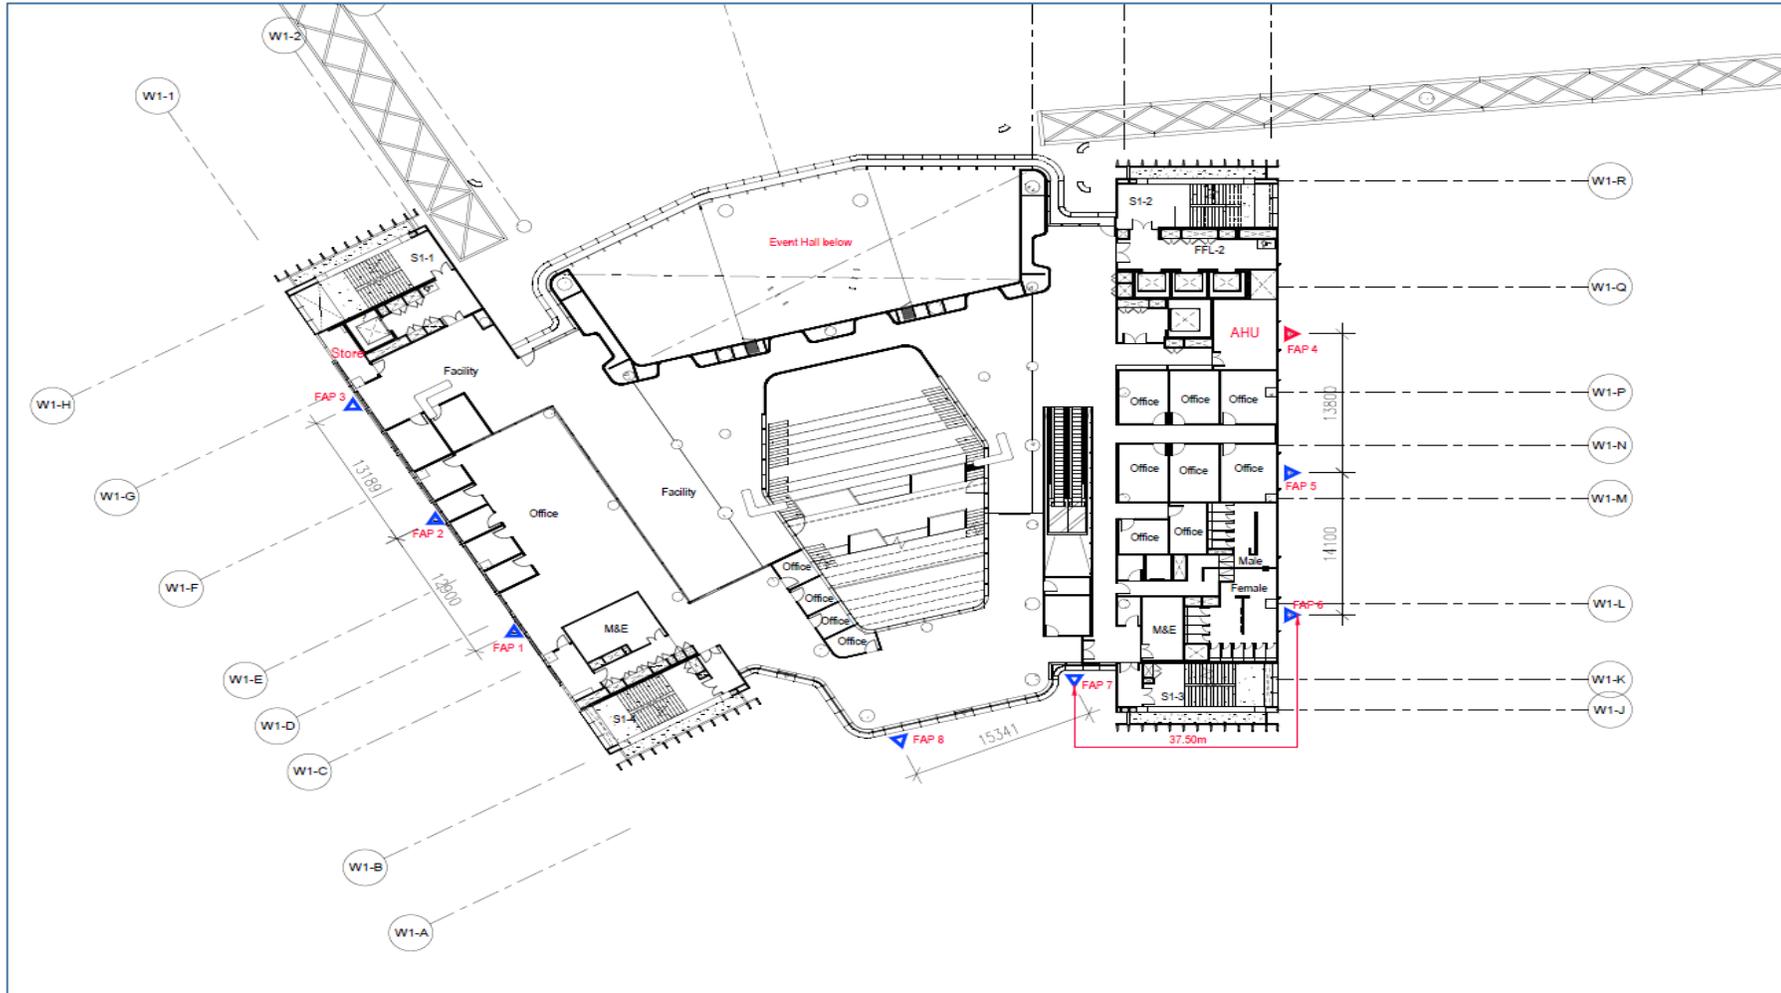

- One fee as the issue and location is similar throughout the various floor

E.g. 4 – Waiver to consider allowing fireman access panel to be spaced more than 20m apart (3<sup>rd</sup> floor)

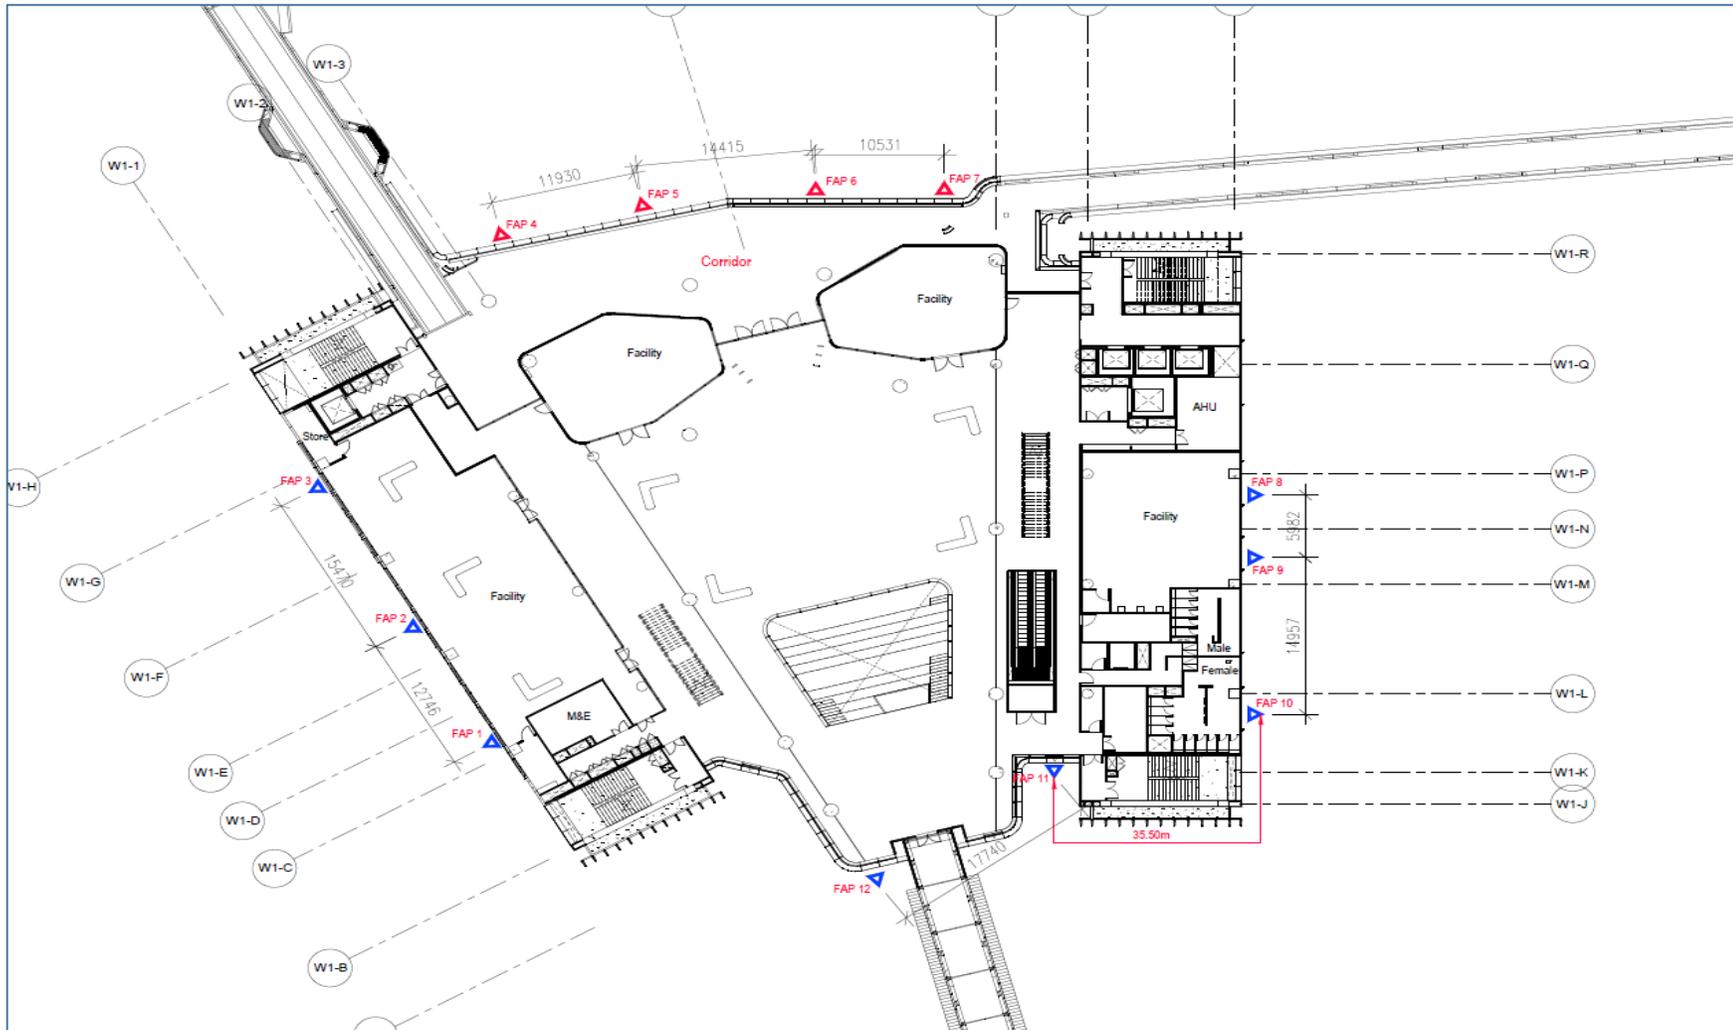

- One fee as the issue and location is similar throughout the various floor

E.g. 4 – Waiver to consider allowing fireman access panel to be spaced more than 20m apart (4<sup>th</sup> floor)

- One fee as the issue and location is similar throughout the various floor

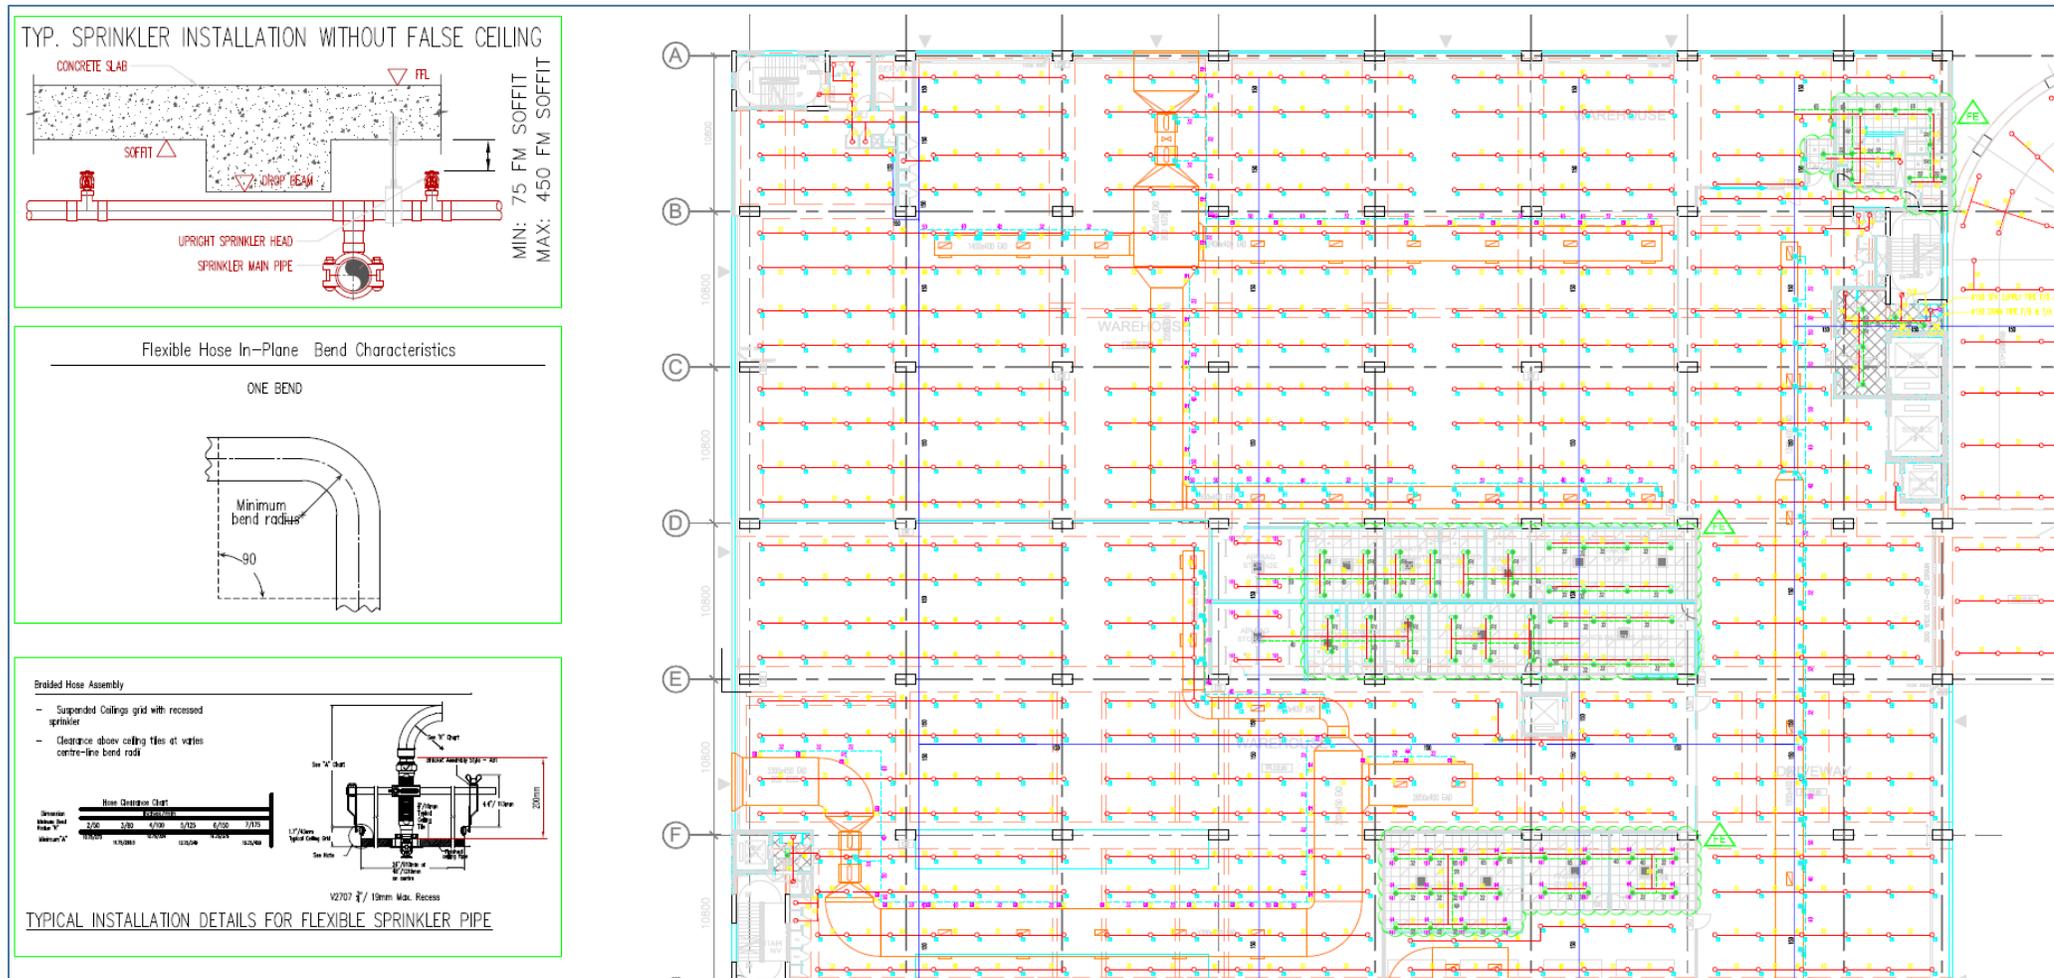

E.g. 4 – Waiver to consider allowing fireman access panel to be spaced more than 20m apart (5<sup>th</sup> floor)

- One fee as the issue and location is similar throughout the various floor

# **Example 5**

E.g. 5 – Waiver to consider allowing the use of flexible sprinkler head, CP52 (Various floors)

- One fee as the issue is on the sprinkler system and is identical throughout the premises
