TRANSPORT CIRCULAR: REQUIREMENTS ON ROAD TRANSPORTATION OF DANGEROUS GOODS

1. Updated Circular

This circular will **supersede** and replace the previous circular. The update is:

- The company details shown on the driver's HazMat Transport Driver Permit (HTDP) must match the company name provided in the licence application at the time of submission.
[refer to Paragraph 3, Approved Transportation Routes Transport Licence]
- GPS-installed HazMat vehicles tracked by SCDF are not allowed to use Hillview Underpass at all times.
[refer to point f of Paragraph 5, Approved Transportation Routes]
- Astrata certification is mandatory for both prime movers and trailers that can be detached for transport licensing purposes. For any matters related to tracking devices, please contact the Astrata representative, at (singaporeops@astratagroup.com) or hotline (94592140).
[refer to Paragraph 7, Tracking of Licensed Vehicles]

2. Road Transportation of Petroleum and Flammable Materials (P&FM)

The road transportation of petroleum and flammable materials in Singapore is regulated under the Fire Safety (Petroleum and Flammable Materials) Regulations. Local and foreign-registered vehicles, e.g. road tankers, prime movers, trailers, lorries, etc. carrying scheduled petroleum and flammable materials are subject to SCDF's transport licensing scheme and requirements stipulated under the regulations.

Foreign-registered vehicles licensed to transport scheduled petroleum and flammable materials must enter Singapore only via Tuas Checkpoint. After immigration clearance by the Immigration and Checkpoints Authority (ICA), these vehicles are required to stop at Cargo Examination Hall Arrival Lane 6 (A6) and report to the SCDF officers for driver verification and vehicle inspection. Failure to do so will be deemed as non-compliance with the enforcement action being taken.

3. Transport Licence

A vehicle transporting scheduled petroleum and/or flammable materials must clearly display SCDF-issued transport licence at top right-hand corner of the vehicle windscreen at all times. Prior to licence issuance, a third-party vehicle inspection is required. Any bulk tank carried on the vehicle must also be tested and certified by a Professional Engineer. The transport licence can be issued up to a maximum duration of 2 years. Applications for transport licences may be submitted online via GoBusiness licensing portal.

The company details shown on the driver's HazMat Transport Driver Permit (HTDP) must match the company name provided in the licence application at the time of submission.

4. Permitted Times for Transport

The following table shows the approved timings for transportation of scheduled P&FM.

S/N	Description	Permitted Times
1.	Petroleum and flammable materials transported at —	
	(a) Woodlands Checkpoint	None
	(b) Tuas Checkpoint (except transport described items 2 and 9)	5 a.m. to 5 p.m.
2.	Petroleum and flammable materials, other than Schedule 1 chemical, transported between Tuas Checkpoint and Jurong West Industrial Estate, Tuas Industrial Estate or Jurong Island	Any time
3.	Petroleum and flammable materials, other than Schedule 1 chemical, transported within Jurong West Industrial Estate, Tuas Industrial Estate and Jurong Island	Any time
4.	Petroleum and flammable materials, other than Schedule 1 chemical, for transshipment transported between Brani Terminal, Pasir Panjang Terminal, Keppel Terminal or Tuas Terminal —	
	(a) where the Commissioner is given 24 hours' prior notice of the proposed time of transport	Any time
	(b) where the Commissioner is not given the prior notice mentioned in paragraph (a)	7 a.m. to 7 p.m.
5.	Unless item 1, 2, 3 or 4 applies, transport of LPG cylinders for domestic purposes or use at an eating place or a restaurant	7 a.m. to 9 p.m.
6.	Unless item 1, 2, 3 or 4 applies, transport of diesel or acetylene to an industrial premise or a construction site —	
	(a) of less than 3 metric tonnes	Any time
	(b) of 3 metric tonnes or more, where the Commissioner is given 24 hours' prior notice of the proposed time of transport	Any time
	(c) of 3 metric tonnes or more, where the Commissioner is not given the prior notice mentioned in paragraph (b)	7 a.m. to 7 p.m.
7.	Unless item 1, 2, 3 or 4 applies, transport of petroleum and flammable materials, other than Schedule 1 chemical, in a tube trailer	9 a.m. to 5 p.m.
8.	Unless item 1, 2, 3 or 4 applies, transport of liquefied natural gas (LNG) in an ISO-tanker	9 a.m. to 5 p.m.
9.	Transport of Schedule 1 chemicals	9 a.m. to 5 p.m.
10.	Where no other item in this table applies, transport of petroleum and flammable materials	7 a.m. to 7 p.m.

5. Approved Transportation Routes

Vehicles transporting licensed P&FM are required to adhere to the approved routes³ as indicated in the table below.

- a) SCDF may review the approved hours for specific transportation based on TQRA findings or when there is a change in risks to the operating environment.

- b) For transportation of 3 metric tons or more beyond 7am-7pm, 24hr in-advance notification is required via the e-mail stated under **Annex C**.

S/N	Type of Transport	Approved Routes ³
1.	Transportation of petroleum and flammable materials to Petrol Service Stations	Refer to Annex A
2.	Transportation of petroleum and flammable materials to all other approved destinations, unless any other condition stated in this table applies	Refer to Annex B
3.	Transportation of Acetylene in cylinders	Refer to Annex B Deliveries will also be permitted to construction worksites ⁵ , outside of Annex B
4.	Transportation of petroleum and flammable materials in tube trailers (e.g. hydrogen) or cryogenic tankers (e.g. LNG)	Refer to approved routes in accordance with Transport QRA (TQRA) or as approved by SCDF
5.	Other hazardous substances regulated by NEA/SPF, i.e. corrosives, toxics, explosives and its precursors	Refer to NEA/SPF
6.	Transportation of bulk LPG	Within Jurong West Industrial Estate, Tuas Industrial Estate or Jurong Island only
7.	Transportation of LPG in cylinders	Except CBD, Benjamin Sheares Bridge, CTE, KPE, MCE, Fort Canning Tunnel, Woodsville & Sentosa Gateway tunnels
8.	Transportation of diesel	Except CBD, Benjamin Sheares Bridge, CTE, KPE, MCE, Fort Canning Tunnel, Woodsville & Sentosa Gateway tunnels
9.	Transportation of scheduled chemicals	Refer to approved routes in accordance with Transport QRA (TQRA) or as approved by SCDF

- c) Vehicles licensed by NEA or SPF are required to adhere to the approved routes as regulated by the respective agencies.
- d) SCDF may review the approved routes for specific transportation based on TQRA findings or when there is a change in risks to the operating environment.
- e) For construction worksites⁵ within or along restricted areas, 24hr in-advance notification is required via the e-mail stated under **Annex C**.
- f) GPS-installed HazMat vehicles tracked by SCDF are not allowed to use Hillview Underpass at all times.

6. HazMat Transport Driver Permit

Driver of a licensed vehicle is required to hold a valid HazMat Transport Driver Permit (HTDP) at all times when transporting petroleum or flammable materials. Prior to issuance of the permit, the driver must pass security screening and attend HazMat Transport Driver Course at SCDF Accredited Training Institutions (ATIs). Upon passing the course, the driver may be issued with HTDP at the Civil Defence Academy. The permit is valid for a period of two years.

7. Tracking of Licensed Vehicles

HazMat Transport Vehicle Tracking System (HTVTS) was implemented on 1 Jul 2005 as part of national efforts to enhance safety and security of Singapore with emphasis on road transportation of dangerous goods. Licensed vehicles carrying (or having the capacity to carry) the following are required to be fitted with a tracking device, in-vehicle immobilizer and orange-colored (colour code: 3284 (CW84) or Sikkens LP2B) licence plate:

- a. Scheduled petroleum and flammable materials of total net quantity **3 Metric Tons (MT)** or more;
- b. Petroleum and/or flammable materials in tube trailers, e.g. hydrogen or LNG cryogenic tankers in any quantity; or
- c. Schedule 1 chemical in any quantity.

Astrata certification is mandatory for both prime movers and trailers that can be detached for transport licensing purposes. For any matters related to tracking devices, please contact the Astrata representative, at (singaporeops@astratagroup.com) or hotline (94592140).

HTVTS-tracked vehicles will be deemed as transporting dangerous goods unless an advanced 24hr notification is sent to inform SCDF. These vehicles must adhere to approved routes and permitted transport timing at all times. Failure to do so constitutes a transport violation where vehicle will be immobilized to stop vehicle from traversing further.

With effect from 01 Apr 2007, in-vehicle immobilizer feature was incorporated. In the event of a violation, the vehicle horn and hazard warning lights on the vehicle will be activated. SCDF will then dispatch fire station responders to investigate the cause of the violation and contact the company concerned. Company is required to immediately contact the driver to take corrective actions and report to SCDF (via the 24/7 HTVTS Hotline: 68483666/ 6848 3337). Company must also ensure that the driver remains contactable at any moment when the vehicle has been immobilized.

In the event that the driver is detained by Police for suspected security violation or if vehicle is found without the driver, SCDF will contact the affected company to make arrangement to drive or tow away the vehicle **within 1 hour** of the arrest. Company also has to provide SCDF with contact particulars of the company personnel towing back the vehicle.

Please take note that both company (licensee) and driver may be subject to enforcement actions and penalties meted out for the violation committed.

Licensee is required to inform SCDF and tracking installation vendor when their HTVTS-tracked vehicle will be sold to another party, scrapped or when transport licence ceased to be renewed respectively.

A lead-time of between 2 and 4 weeks is required by tracking installation vendor for HTVTS tracking unit replacement and annual inspection.

8. Advanced Notifications

If licensed vehicle is not transporting dangerous goods at any specified time, bypassing or seeking authorized entry into restricted areas such as Ministries, Embassies, Sentosa Island, etc. the company must notify SCDF. Licensee is required to complete the notification form (**Annex C**) and e mail it to SCDF at least **24 hours in-advance**. Transport schedule (if any), routes taken and legitimate reasons for exemption are to be listed. (refer to **Annex C**)

For access into Central Business District (CBD), with effect from **01 Jul 2019**, a self-service verification kiosk for drivers (refer to **Annex D**) will commence operation. Drivers are required to follow the video instructions as shown in the kiosk to do self-verification. Upon successful verification from kiosk, drivers can then proceed into the CBD.

Note: The requirement to seek approval to access CBD has been enforced since 1 Oct 2005. It will be the responsibility of HazMat drivers to proceed to the kiosk for verification prior to making their way into the CBD. Entry into CBD without authentication and clearance from SCDF will be deemed as a violation.

Drivers encountering any issue pertaining to the use of self-service verification kiosk may contact HTVTS 24hr-Hotline at 6848 3666 / 6848 3337 for assistance.

9. Other Transport Requirements

In addition to the requirements highlighted in this Circular, other key requirements are:

- a. Availability of Transport Emergency Response Plan (TERP) in vehicle transporting petroleum and flammable materials.
- b. Additional security requirements (e.g. armed escorts) for Schedule 1 chemicals

Details of regulatory requirements can be accessed via Singapore Statutes Online website (<https://sso.agc.gov.sg>).

10. Further enquiries

For further enquiries or assistance, to contact:
