

Annex A

Vehicle Inspection Checklist A

Inspection Checklist for Package and/or Bulk Transportation.

Prime mover and trailer (bulk tank, ISO tank).

Road tanker (single entity lorry).

Prime mover and trailer (trucking container containing petroleum or Flammable materials in package, examples drums, bottles, pallets etc).

* Transport of petroleum and flammable materials in bulk means transport of petroleum and flammable materials in container more than 250 litres water capacity.

S/No.	Technical Requirements
1	Exhaust system in order.
2	Fire shield at rear of cabin provided & in order.
3	Battery cut off functioning as intended.
4	Discharge faucets in order.
5	Emergency cut off for tanker in working order.
6	Transport Emergency Information Panel (TEIP) according to Singapore Standard 586 shall be displayed at the back and both sides of the vehicle.
7	Warning sign “Danger, Highly Flammable” according to Petroleum & Flammable Material Regulations shall be displayed at the back of the vehicle.
8	Heavy-duty steel bumper at least 15 cm from the tank.
9	Earthing strap provided and long enough to touch the ground.
10	Metal conduits for all wirings in good condition.
11	Manhole covers in order.
12	Coaming satisfactory and projected at least 25 mm above manhole covers.
13	Pressure, level & temperature gauges provided.
14	Safety relief valves provided.
15	Proper battery compartment.
16	Vehicle is equipped with one 9 KG dry powder fire extinguisher and i) 1 x 1 KG dry chemical fire extinguisher, OR ii) 1 x 2.3 KG dry carbon dioxide fire extinguisher

Annex B

Vehicle Inspection Checklist B

Inspection Checklist for Package and/or Bulk transportation.

Vehicles constructed to carry goods (e.g. lorries, pick-ups).

* Transport of petroleum and flammable materials in package means transport of any petroleum or any flammable materials in one or more containers of less than 250 litres water capacity.

* Vehicles used for transport of flammable gases must not have a roof covering.

S/No.	Technical Requirements
1	Platform of the vehicle is lined with timber or is timber constructed to minimize contact between the metal parts of the platform and any container.
2	Protective railings lining the platform of the vehicle are at least 1 m in height to secure any container and to prevent such container from falling off the vehicle when the vehicle is in motion.
3	Glass at the back of the driver cabin, if any, is of wired glass or toughened or safety of not less than 6 mm in thickness to act as a fire resisting shield.
4	Battery is covered with appropriate insulation material to prevent electrical spark from igniting any flammable vapor from any container.
5	Earthing strap provided and long enough to touch the ground.
6	Exhaust pipe is extended at least 150 mm outwards away from the vehicle tail box or is directed downward to keep vehicle exhaust away from any container.
7	Warning placard according to Singapore Standard 586 shall be displayed at the front, both sides and the back of the vehicle.
8	Warning sign “Danger, Highly Flammable” according to Petroleum & Flammable Material Regulations shall be displayed at the back of the vehicle.
9	Vehicle is equipped with one 9 KG dry powder fire extinguisher and i) 1 x 1 KG dry chemical fire extinguisher, OR ii) 1 x 2.3 KG dry carbon dioxide fire extinguisher.

Vehicle Inspection Checklist C

Inspection Checklist for Package transportation.

Enclosed Vehicles (e.g. Van or Boxed-up vehicle).

* Transport of petroleum and flammable materials in package means transport of any petroleum or any flammable materials in one or more containers of less than 250 litres water capacity.

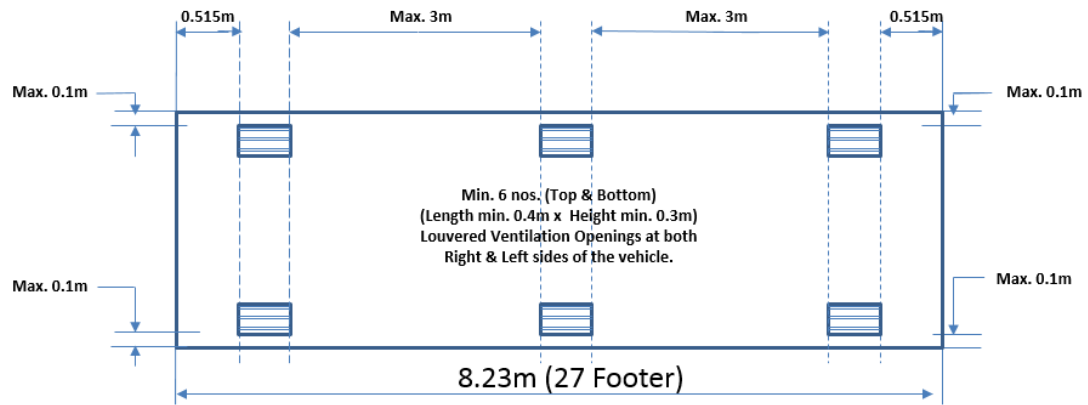

S/No.	Technical Requirements
1	Adequate ventilation shall be provided on top and bottom (louvres) and exhaust fan according to Petroleum & Flammable Material Regulations.
2	Platform of the vehicle is lined with timber or is timber constructed so as to minimize contact between the metal parts of the platform and any container.
3	Battery is covered with appropriate insulation material to prevent electrical spark from igniting any flammable vapor from any container.
4	Exhaust pipe is extended at least 150 mm outwards away from the vehicle tail box or is directed downward to keep vehicle exhaust away from any container.
5	Warning placard according to Singapore Standard 586 shall be displayed at the front, both sides and the back of the vehicle.
6	Warning sign “Danger, Highly Flammable” according to Petroleum & Flammable Material Regulations shall be displayed at the back of the vehicle.
7	Vehicle is equipped with one 9 KG dry powder fire extinguisher and i) 1 x 1 KG dry chemical fire extinguisher, OR ii) 1 x 2.3 KG dry carbon dioxide fire extinguisher

Vehicle Inspection Checklist C

Apart from the opening on top behind the driver's cabin, please see our requirement:

- 1 Only Class 3 FM Liquid/Petroleum & Class 4 Solids are permitted to be transported in a boxed-up/enclosed vehicle with:
 - Adequate ventilation shall be provided to prevent accumulation of any flammable vapours in the vehicle.
 - Spacing between top and bottom ventilation louvers shall not exceed 3 m horizontally.
 - Exhaust fan to circulate air inside the vehicle.
 - The glass at the back of the driver cabin is of wired glass or toughened or safety glass of not less than 6 mm in thickness to act as a fire shield.
- 2 **Class O Petroleum** and/or **Class 2.1 Flammable Gas** are not permitted to be transported in a boxed-up vehicle or vehicle with roof covering whether permanent or otherwise.

Vehicle Inspection Checklist D

Inspection Checklist for LNG transportation.

Vehicles (e.g. Prime Mover, Trailer and Road Tanker).

S/No.	Technical Requirements
1	Prime Mover/ Road Tanker equipped with ABS system.
2	Fire shield at rear of cabin provided and in order.
3	Roll Over Prevention Stability System provided.
4	Exhaust system in order (adequately shielded from direct contact with fuel from overfilled tanks and leaks).
5	Heavy-duty steel under-run protection at the rear and sides, at least 15 cm from the tank.
6	Metal conduits for all electrical wirings in good condition.
7	Anti-Tow Interlocks systems (to prevent driving away while connected to driving rack or during dispensing) in order.
8	Battery cut off functioning as intended.
9	Battery is covered with appropriate insulation material to prevent electrical spark from igniting any flammable vapor from any container.
10	Transport Emergency Information Panel (TEIP) according to Singapore Standard 586 shall be displayed at the back and both sides of the vehicle.
11	Earth winch shall be provided for operating during load and unloading of LNG.
12	Spark arrestor (Flame Trap) provided.
13	Earthing strap provided and long enough to touch the ground.
14	Visual Inspection on Outer Vessel / Tank (eg. to inspect for any sign on sweating, cold spots or algae).
15	All vent pipe nozzles are piped upwards and are not piped downwards to the chassis (LNG Trailer/ ISO Tanker).
16	Discharge Faucets in order.
17	Lighting in cabinets shall be Vapor Proof design or explosion proof design (Intrinsically safe).
18	Cabinet enclosure shall be designed with louvers.
19	All valves and Safety pressure relief valves provided.
20	Pressure and Level gauges provided.
21	Vacuum reading in working order (< 20 micron).
22	Emergency cut off device in working order.
23	Pump, Vaporizer and piping yearly maintenance report (Renew).
24	Vehicle is equipped with one 9 KG dry powder fire extinguisher and i) 1 x 1 KG dry chemical fire extinguisher, OR ii) 1 x 2.3 KG dry carbon dioxide fire extinguisher

Astrata Installation / Inspection

Note that vehicles are required to install **Tracking Devices, Immobilizer, Horns & Blinkers and an Orange-coloured vehicle licence plate** if the following conditions are met:

- Transporting 3 Metric Tonnes (MT) or more of Petroleum and/or Flammable Materials (P&FM).
- Transporting Hydrogen, Silane and Compressed Natural Gas (CNG) in tubes (regardless of quantity).

3 MT refers to 3000 Kilograms (KG) or 3000 Litres (L) with reference to the physical state of the regulated chemical (i.e. Litres for Petroleum and other Flammable Liquid; Kilograms for Liquefied Petroleum Gas [LPG], Gaseous Flammable Material [FM] & Solid FM). Vehicle owners can liaise with the agent directly for the installation of the above-mentioned items.

Foreign vehicles transporting 3 MT (net weight) or more of P&FM **OR** Hydrogen, Silane & CNG in tubes (regardless of quantity) will also need to comply with the above requirements. Failing to do so will result in vehicles having to turn back at Tuas checkpoint.

Vehicles installed with tracking devices are to strictly adhere to the approved routes and transportation hours (refer to SCDF transport circular). For more details on Transport requirements of Petroleum and Flammable Materials, please visit:

P&FM Transport Licence

Transport Emergency Response Plan (TERP)

As part of our continued efforts to create a pro-enterprise environment, SCDF has reviewed the Transport Emergency Response Plan (TERP) online submission process. To simplify the online application process, the TERP shall be submitted as part of the Flammable Material Transportation Licence application with effect from 1st August 2017.

Please submit the TERP document together with other supporting documents through **GoBusiness**.

Following the implementation of this initiative, TERP applications (New and Renew) in the SCDF **e-Services** will be closed.

For any clarification on TERP, you may email to SCDF_FMI_FMT@scdf.gov.sg
