---

**SCDF**  
The Life Saving Force
Insurance
You would be pleased to know that the premiums will not be higher for insured persons who are trained to respond to emergencies. Also, depending on the type of insurance coverage, the payout for the injuries suffered would differ. It also does not mean that the claim would definitely be declined just because the injuries were sustained while helping someone.
National CERT Standard

• Training and equipment are compulsory
• “Recommended” training because alternative courses may also be recognised
• Optional items clearly labelled (optional)
• Tier 1 & 2 premises will be notified by mail
• All other FSM premises are tier 3 premises
Insurance

• Insurance premium and coverage not affected
  – Confirmed with multiple agents representing different insurance companies

• Exact coverage and terms determined by individual policy
  – Companies can check with insurance companies and agents for more details on specific policies
